Set static ip

```
sudo vi /etc/netplan/01-netcfg.yaml

network:
   version: 2
   renderer: networkd
   ethernets:
      ens33:
         addresses:
            - 192.168.207.129/24
         nameservers:
            addresses: [8.8.8.8, 8.8.4.4]
         routes:
            - to: default
              via: 192.168.207.2
```

sudo netplan apply
sudo ip addr del 192.168.207.131/24 dev ens33
